Kelly:

These are the coordinates that I received from RRC. Are they keeping you informed of the status?

Thanks

Hey Gary

as discussed awhile ago, according to the RRC, the spill made it to just past FM 463

The coordinates we have for the general tank battery location is:

N29.252377

W098.812825

The email below from is Aimee Beveridge with the RRC in their Austin Central Office, they supplied the map, it's not real clear or detailed...

The information we have is that oil made it into one, possibly two garages, one of which had been converted into a game room.

9745280

Please keep us updated if EPA takes action, I will try to meet you on-site if it occurs.

Thanks!

kelly

Good Afternoon, Kara:

As we discussed today, the RRC would like to know if the TCEQ has any information on water intakes or water wells in the affected areas of the release in Lytle, See the enclosed map. . Your assistance appreciated.

Thank you,

Aimee
